

OMNILUBE® 32/46, 68, & 455 SERIES

LONG-LIFE FOOD GRADE COMPRESSOR LUBRICANTS
PRODUCT CODES: OMNILUBE 32/46, 68, 455

PRODUCT OVERVIEW

Omnilube® 32/46, 68, and 455 are fully synthetic compressor oils formulated from the highest quality polyalphaolefin (PAO) base oils with a superior proprietary additive package to achieve long life. These long-life compressor lubricants provide significantly improved wear, oxidation stability and lubricity over the currently available H-1 food grade synthetic oils allowing the service life to increase by 50% to 100%.

These compressor lubricants feature superior thermal and oxidation stability enabling them to operate over a wide range of temperatures without coking, deposit formation, or corrosion. The lubricants have low volatility and compatibility with mineral oil lubricants. The series are non-toxic and accepted for use in food processing facilities where NSF H1 Certified products are permitted.

Dependent upon the rotary screw design Omnilube 32/46 and 68 can give a service life of up to 8,000 service hours in good operating conditions. Omnilube 455 is designed for reciprocating compressors.
